

# ECSEL-Austria

Electronic Components  
and Systems for European  
Leadership – Austria

# About ECSEL-Austria

*ECSEL-Austria is an industry-driven national research, development and innovation platform representing the technology areas of micro- and nanoelectronics, embedded systems and systems integration.*

- **2013:** founded based on ARTEMIS-Austria (embedded software and software architecture) and ENIAC-Austria (micro- and nanoelectronics)
- **Legal Status:** Verein
- **Members:** 41

## Our Mission

**Secure supply of key technologies and critical knowhow in the field of electronic based systems to support innovation in all major sectors of the economy and society**

## Our Vision

**European leadership in electronic components and systems**

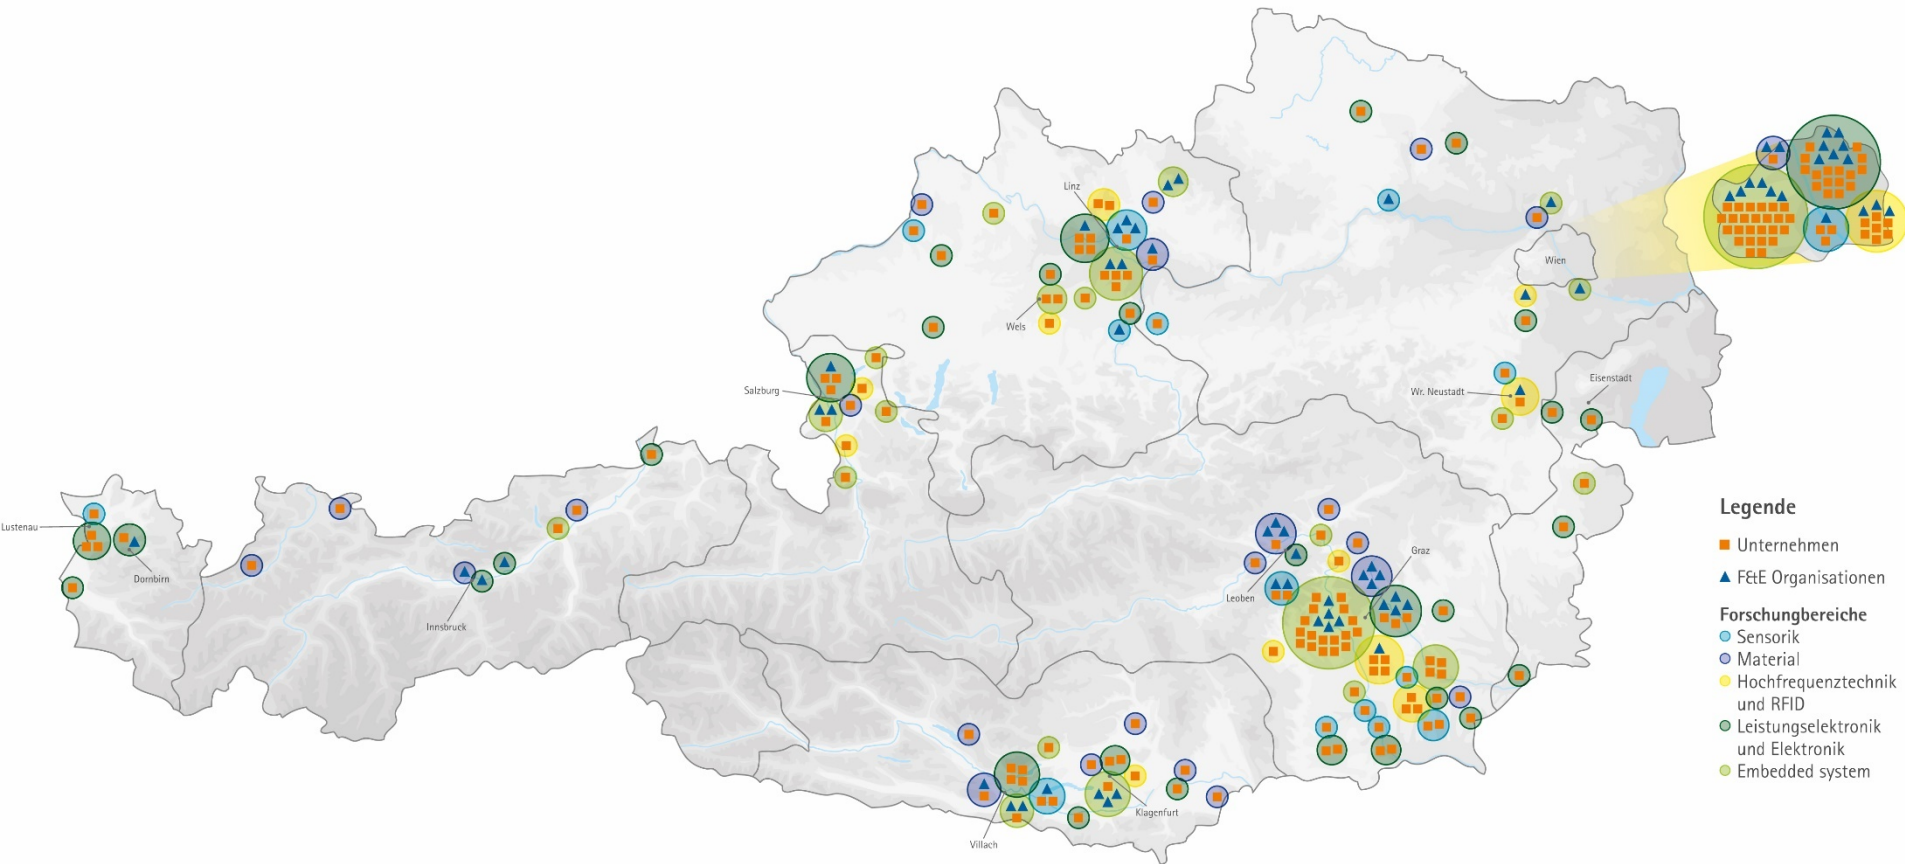

## Our main objectives

- 1. strengthen the international competitiveness of Austrian companies in the European ECS funding/innovation system**
- 2. encourage the cooperation, focus and performance of Austrian R&D institutions**
- 3. develop inputs for the European and Austrian research programmes based on the strengths of Austrian R&D actors**
- 4. increase the international visibility of Austrian enterprises and R&D facilities due to leading edge technologies**
- 5. Austrian ECS eco system is perceived as valuable partner in large collaborative European projects**
